Part 3 Provider-driven contract testing

11 Implementing provider-driven contract testing

11.1 Introduction to provider-driven contract testing

11.1.1 Why was PDCT introduced?

11.1.2 How PDCT addresses the drawbacks of CDCT

11.1.3 Drawbacks with PDCT

11.2 Implementing consumer test adapters

11.2.1 Cypress consumer adapter

11.2.2 WireMock consumer adapter

11.2.3 Publish consumer contracts

11.3 Implementing provider tests with API testing tools

11.3.1 Postman and OpenAPI example

11.3.2 Dredd and OpenAPI example

11.3.3 Publish provider API specification and test results

11.3.4 Checking consumer contracts

12 Moving integration tests to contract tests

12.1 When to use integration tests over contract tests

12.2 Identifying suitable integration tests to migrate

12.3 Refactoring integration tests to contract tests

12.4 Refactoring end-to-end tests to contract tests

appendix A Tool comparisons

A.1 Contract-based tools

A.1.1 Pact

A.1.2 Pact Broker

A.1.3 PactFlow
