

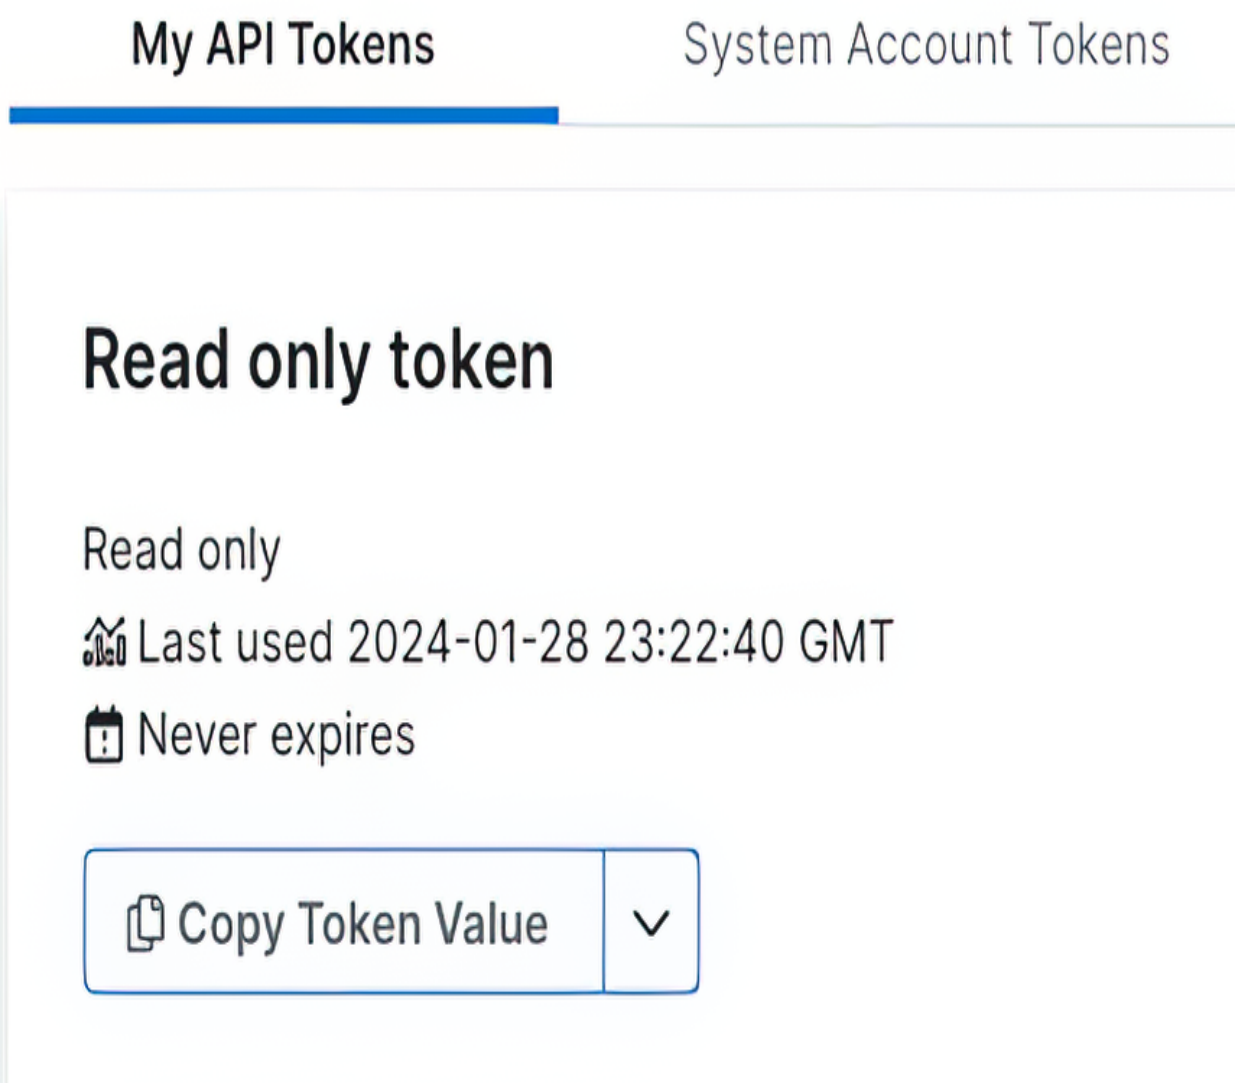

Figure 4.8 PactFlow settings page to access the API Tokens and PactFlow base URL

Once you've copied the base URL and API token, you can export them by typing the following in to your terminal:

```
# Mac
export PACT_BROKER_BASE_URL=<YOUR_BASE_URL>
export PACT_BROKER_TOKEN=<YOUR_TOKEN>
# Windows
set %PACT_BROKER_BASE_URL%=<YOUR_BASE_URL>
set %PACT_BROKER_TOKEN%=<YOUR_TOKEN>
```

If you're a Windows user, replace `export` with `set`. You can verify if the environment variables have exported correctly if you typed the following:
