```
RUNS graphql/provider/graphql-server-contract.spec.js
The pact at https://mariecruz.pactflow.io/pacts/provider/GraphQLProvider/consumer/GraphQLConsumer/pact-ver
sion/41e368c38beb297e0f52c693b0e6887bbd8a8772 is being verified because the pact content belongs to the co
nsumer version matching the following criterion:
    * latest version tagged 'main' (1.0.2)

Verifying a pact between GraphQLConsumer and GraphQLProvider

  a movies request (2s 501ms loading, 429ms verification)
    returns a response which
      has status code 200 (OK)
      includes headers
        "Content-Type" with value "application/json; charset=utf-8" (OK)
      has a matching body (OK)

  console.log
    Pact Verification Complete!

      at log (graphql/provider/graphql-server-contract.spec.js:20:17)

  console.log
    Result: finished: 0

      at log (graphql/provider/graphql-server-contract.spec.js:21:17)

PASS graphql/provider/graphql-server-contract.spec.js (5.142 s)
  Pact Verification
    ✓ should validate the expectations of GraphQLConsumer (4576 ms)
```

**Figure 7.8 Example test run output of pact verification between GraphQLConsumer and GraphQLProvider**

When you navigate back to PactFlow, you should see that the GraphQL contract has now been verified, as shown in figure 7.9.
