

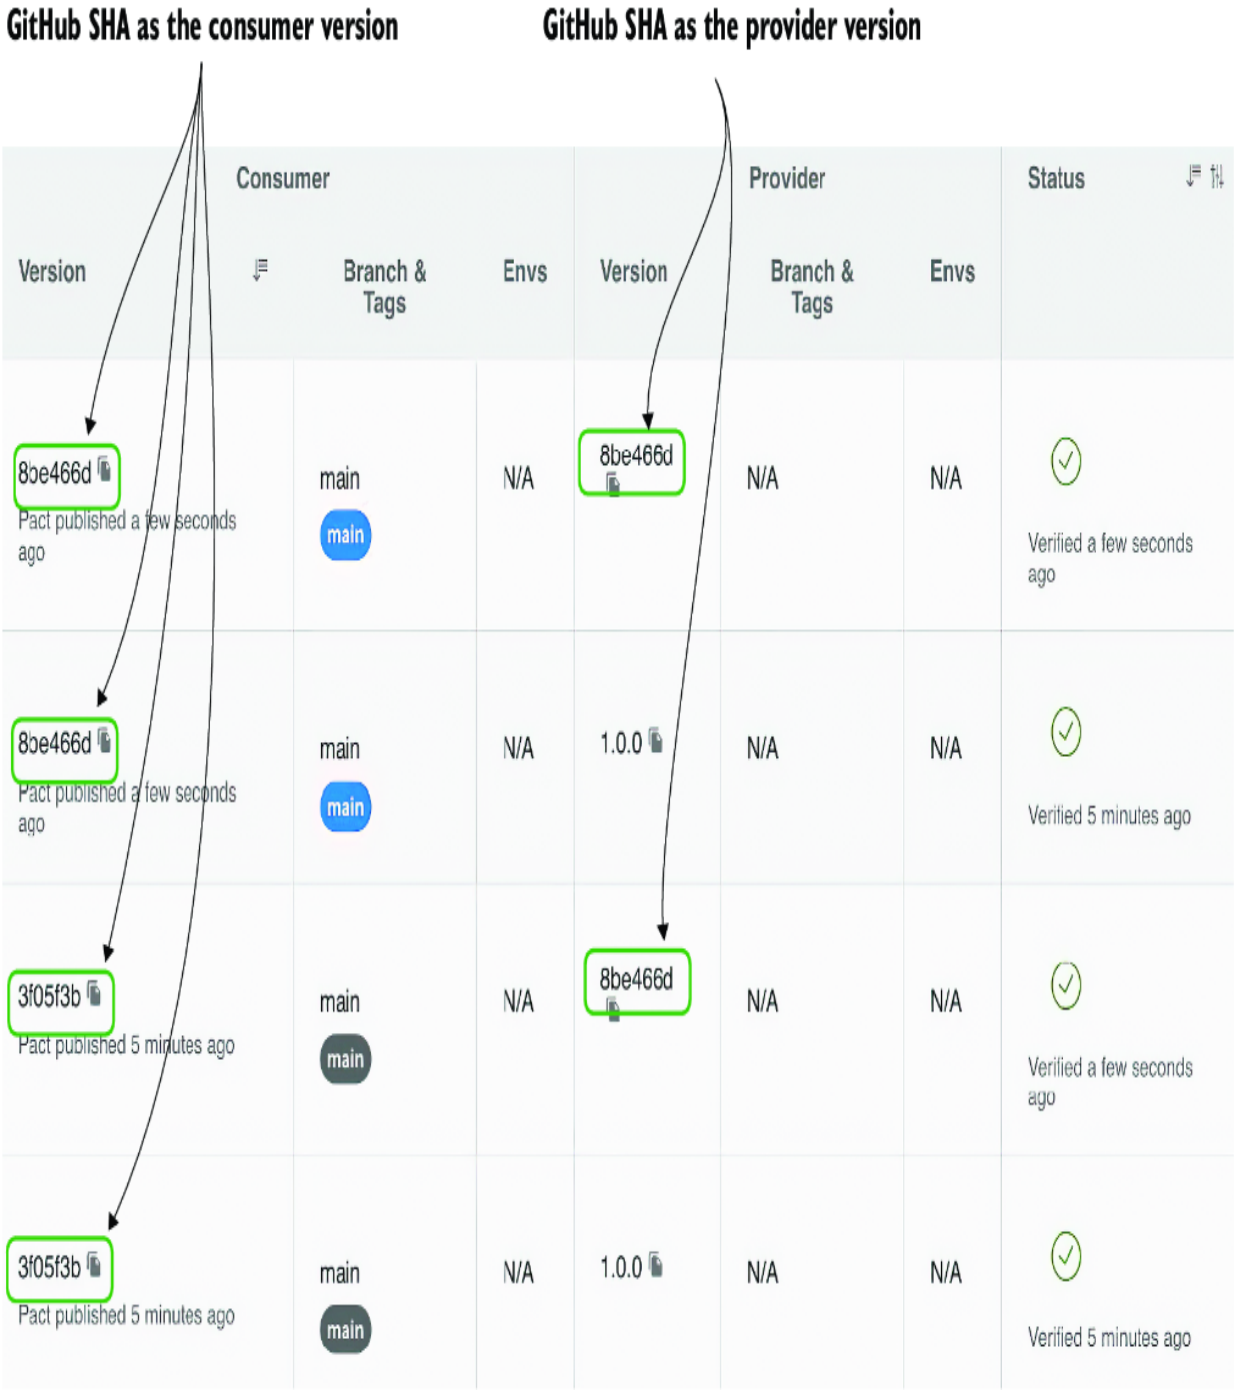

Figure 10.4 Matrix table for WebConsumer and MoviesAPI integration. The provider version now also has the GitHub SHA as its version instead of a manual version.

Both the consumer and provider now contain the GitHub SHA as unique versions. Pact also automatically verifies all the relevant versions that are compatible. As an example, the consumer team can look at the matrix table and can confidently say that commits `8be466d` and `3f05f3b` can be
