After the test is completed, the contract will be generated at `cypress/pacts`, as shown in listing 11.5. The metadata object contains the client data, mentioning that the Pact Cypress adapter has generated the contract. The request data described in the `cy.intercept` mock setup, as shown in the `request` object, the path has the API URL. The body also has the mocked response JSON taken from the `cy.intercept` mock setup shown in the `response` object.
