blueprint: http://localhost:3001/swagger.json
endpoint: 'http://127.0.0.1:3001'
```

Run the `dredd` command, as shown in the following listing, by adding the following script to the `package.json` file.

Listing 11.18 Dredd run command

```
"bi:provider:dredd": "dredd"
```

On completion of running the script on the terminal as

```
npm run bi:provider:dredd
```

you'll find the test output report at ./output/dredd-report.md, which should look like figure 11.5. Each scenario detailed within the OpenAPI specification should have a test result in the output report.
