Running the `can-i-deploy` command shows the verification was successful, as shown in figure 11.7.

```
> pact-broker can-i-deploy --pacticipant BiWebConsumer --version=0.0.1 --to-environment production

Computer says yes \o/
```

Figure 11.7 The can-i-deploy Cypress consumer and Postman provider output, showing SUCCESS as True if safe to deploy

From the output, there is a URL that takes you to the contract comparison screen with a detailed output of the compatibility checks that were performed between the consumer interactions and OpenAPI specification, as shown in figure 11.8.
