    "name": "MoviesAPI"
  }
}
```

12.4 Refactoring end-to-end tests to contract tests

Another question we often get asked is which end-to-end (E2E) tests can be converted to contract tests. E2E tests have a different purpose and cover many different parts of the application. We did touch on a use case for contract testing within an E2E testing framework in chapter 9, as shown in listing 9.1. One use case is using contracts to replace mocks within E2E tests, as shown in figure 12.5.
