In addition, you also need to have a GitHub account. If you don't have an account, head to https://github.com/signup, and follow the sign-up instructions. Once you have an account, you're ready to fork the project. To do that, visit https://github.com/mdcruz/pact-js-example, and click Fork, as shown in figure B.2.

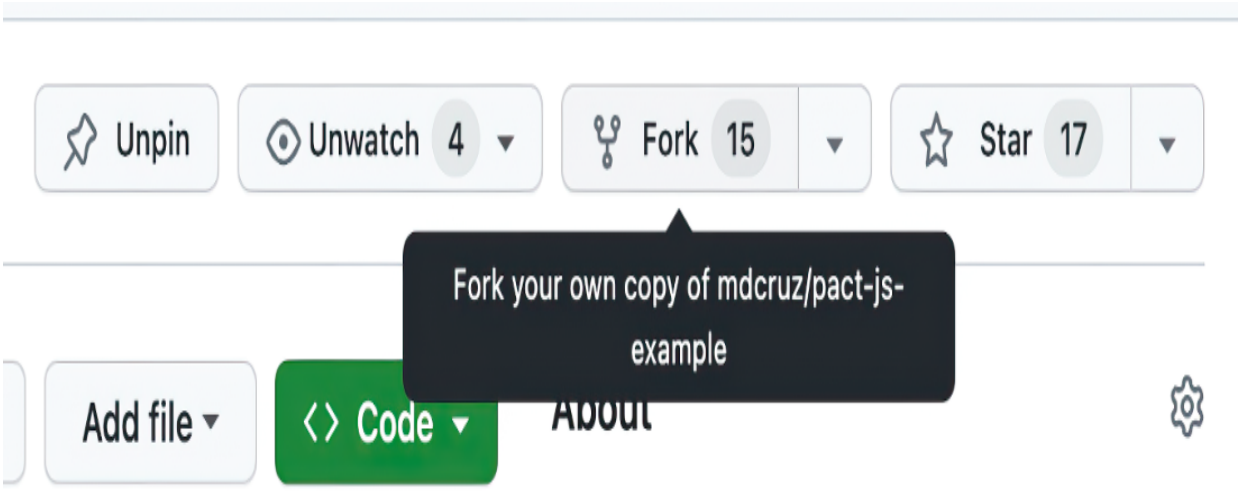

Figure B.2 Forking the example GitHub project

Clicking Fork will lead you to a different page, as shown in figure B.3. For simplicity, keep all the fields as is. The Owner field should be populated with your GitHub account name.
