

Figure B.3 Creating a new fork page

Click Create Fork. Once complete, you should have your copy of the GitHub project. The next step is for you to clone the forked project to your local machines. To do that, click the Code button. Under Clone, you'll see multiple ways to do it, as shown in chapter 4, figure 4.8. You can either clone the GitHub project via HTTPS or Secure Shell (SSH). For cloning the project using HTTPS, make sure you're in the HTTPS tab and click the
