```
const { Verifier } = require('@pact-foundation/pact');

const options = {
  provider: 'GraphQLProvider',
  providerBaseUrl: `http://localhost:4000/graphql`,
  pactBrokerUrl: process.env.PACT_BROKER_BASE_URL,
  pactBrokerToken: process.env.PACT_BROKER_TOKEN,
  providerVersion: process.env.GITHUB_SHA,
  publishVerificationResult: true,
  providerVersionBranch: process.env.GITHUB_BRANCH,
  consumerVersionSelectors: [
    { mainBranch: true },
    { matchingBranch: true },
    { deployedOrReleased: true }
  ],
};

const verifier = new Verifier(options);

describe('Pact Verification', () => {
  test('should validate the expectations of GraphQLConsumer', () => {
    return verifier
      .verifyProvider()
      .then(output => {
        console.log('Pact Verification Complete!');
        console.log('Result:', output);
      });
  });
});
```

The code marked as bold is the additional code you must add to the package.json file:
