- return 0; : Indicates that the program terminated successfully.

Step 2: Compiling the Program:

Open your terminal or command prompt, navigate to the directory containing hello.c , and type:

gcc hello.c -o hello

- gcc : Invokes the GCC compiler.
- hello.c : Specifies the source file to compile.
- -o hello : Generates an executable file named hello .

Step 3: Running the Executable:

On Windows:

hello.exe

-

On macOS/Linux:

./hello

-

Output:

Hello, World!
