```
int age;

float salary;

char grade;
```

### Naming Conventions:

- Variable names can consist of letters, digits, and underscores.
- They must begin with a letter or underscore.
- C is case-sensitive ( `Variable` and `variable` are different).
- Reserved keywords cannot be used as variable names.

## Data Types

C provides several built-in data types to handle different kinds of data:

**Primary Data Types:**

**Integer Types ( `int` ):**
Used to store whole numbers.

```
int x = 5;
```

1.
