```
unsigned int b;    // Only positive values

long int c;        // Larger range integer
```

2.2 Operators and Expressions

Operators are symbols that perform operations on variables and values. They are the building blocks of expressions, which are combinations of variables, operators, and constants.

Types of Operators:

1. Arithmetic Operators:

Used for mathematical calculations.

Operator	Description	Example
+	Addition	a + b
-	Subtraction	a - b
