```
if (condition) {
    // Code to execute if the condition is true
}
```

Example:

```
#include <stdio.h>
int main() {
    int num = 10;
    if (num > 5) {
        printf("Number is greater than 5\n");
    }
    return 0;
}
```
