```
int main() {
    int num = 10;

    if (num > 5) {
        if (num < 15) {
                printf("Number is between 5 and 15\n");
        }
    }
    return 0;
}
```

Example of Nested Loops:

```
#include <stdio.h>
int main() {
    for (int i = 1; i <= 3; i++) {
```
