Example: Dynamic Array Allocation

```
#include <stdio.h>

#include <stdlib.h>

int main() {

    int n, i;

printf("Enter number of elements: ");

scanf("%d", &n);

int *arr = (int*) malloc(n * sizeof(int));  // Dynamic memory allocation

if (arr == NULL) {

    printf("Memory allocation failed!\n");

    return 1;

}
```
