5.3 Backend destinations for metrics 101

Cloud providers 103 ▪ Open source metrics backends 104 Commercial offerings for metrics backends 106

5.4 Backend destinations for traces 106

Cloud providers 106 ▪ Open source traces backends 107 Commercial offerings for trace backends 108

5.5 Columnar data stores 108

5.6 Selecting backend destinations 114

Costs 114 ▪ Open standards 116 ▪ Back pressure 116 Cardinality and queries 116

6 Frontend destinations 120

6.1 Frontends 121

Grafana 121 ▪ Kibana and OpenSearch Dashboards 128 Other open source frontends 130 ▪ Cloud providers and commercial frontends 130

6.2 All-in-ones 131

CNCF Jaeger 131 ▪ CNCF Pixie 134 ▪ Zipkin 135 Apache SkyWalking 136 ▪ SigNoz 136 ▪ Uptrace 136 Commercial offerings 137

6.3 Selecting frontends and all-in-ones 139

7 Cloud operations 142

7.1 Incident management 143

Health and performance monitoring 143 ▪ Handling the incident 145 ▪ Learning from the incident after the fact 146

7.2 Alerting 146

Prometheus alerting 146 ▪ Using Grafana for alerting 154 Cloud providers 154

7.3 Usage tracking 155

Users 155 ▪ Costs 156

8 Distributed tracing 158

8.1 Intro and terminology 160

Motivational example 160 ▪ Terminology 163 Use cases 164
