8.2 Using distributed tracing in a microservices app 164

Example app overview 164 ▪ Implementing the example app 165 ▪ The "happy path" 167 ▪ Exploring a failure in the example app 168

8.3 Practical considerations 169

Sampling 170 ▪ Observability tax 171 ▪ Traces vs. metrics vs. logs 172

9 *Developer observability 174*

9.1 Continuous profiling 176

The humble beginnings 177 ▪ Common technologies 180 Open source CP tooling 184 ▪ Commercial continuous profiling offerings 186 ▪ Using continuous profiling to assess continuous profiling 187

9.2 Developer productivity 190

Challenges 190 ▪ Tooling 191

9.3 Tooling considerations 194

Symbolization 194 ▪ Storing profiles 194 ▪ Querying profiles 195 ▪ Correlation 195 ▪ Standards 195 Using tooling in production 195

10 *Service level objectives 197*

10.1 The fundamentals of SLOs 198

Types of services 200 ▪ Service level indicator 200 Service level objective 201 ▪ Service level agreement 202

10.2 Implementing SLOs 202

High-level example 202 ▪ Using Prometheus to implement SLOs 203 ▪ Commercial SLO offerings 208

10.3 Considerations 209

11 *Signal correlation 211*

11.1 Correlation fundamentals 212

Correlation with OpenTelemetry 213 ▪ Correlating traces 215 Correlating metrics 216 ▪ Correlating logs 216 ▪ Correlating profiles 216

11.2 Using Prometheus, Jaeger, and Grafana for correlation 217

Metrics–traces correlation example setup 217 ▪ Using metrics–traces correlation 219
