frontend destinations vs. backend 95
FrostDB 110
full-text indexing, log lines 26
function as a service (FaaS) 56–57

G

game day, incident management 146
gateway mode, collector deployment 83
Google Cloud for SLOs 208
Google Cloud Logging 98
Google Cloud Managed Service for Prometheus 104
Google Cloud Monitoring 104
Google Cloud Profiler 186
Go program 15–16
Go programming language, continuous profiling 179
g:Profiler 187
Grafana 121–129
  alerting with 154
  correlation example 217–220
Grafana Agent 76
Grafana Labs Loki 100
Grafana Mimir 105
Grafana Tempo 107
Graphite agent 77

H

"happy path" microservices app example 167–168
head-based sampling, distributed tracing 171
head-based sampling of traces 40
health and performance monitoring, cloud operations 143–145
ho11y synthetic signal generator 165
Honeycomb 138, 209
hot data, logs 25

I

icicle graphs 182
Icinga 105
incident management, cloud operations 143–146
InfluxDB 105
infrastructure operations, role of 6
ingestion
  distributed tracing costs 171
  of signals into destination 97, 114
Instana 100, 138
instrumentation
  correlation layer 213
  cost assessment 16
  distributed tracing costs 171
  logs 19–20, 24
  metrics 28–29, 32
  overview 66–67
  traces 36–37, 39
  your code as source 64
  See also OpenTelemetry
internal users, tracking usage 156

J

Jaeger 88, 107
  components and example 131
  correlation example 217–220
  tracing backend destination 85–86
Java Virtual Machines (JVMs) 48
journalctl 48
JVMs (Java Virtual Machines) 48

K

Kibana frontend 128–129
Kubernetes
  compute-related sources 51–55
  container runtime interface 49
  Pixie 134
Kubernetes environment 1
  logging 21

L

label-based indexing, log lines 26
label-based scheme, metrics 27
labels, Prometheus 74
Lightstep 138
LinDB 105
load balancers 62
local traces 34
Log4j challenges 68
log event 18
log levels 48
log routers 24
  Fluentd and Fluent Bit 68–71
  other routers 73
  overview 67–68
logs signal type
  backend destinations 97–101
  compute-related sources 47
  containers 49
  continuous profiling and logging 176
  correlation 214–216
  costs and benefits 24–26
  instrumentation 19–20, 80
  Kubernetes 52–54
  microservices app 8
  observability 26
  open standards for backends 116
  overview 17–19
  telemetry 20–23
  vs. traces 172
Logz.io 100
Looker Studio 130
low-level metrics 27
Lumigo 138

M

M3DB 105
manual instrumentation 80
Metabase 130
metadata, signal correlation 212–213, 222
metric name, Prometheus 74
metrics signal type
  backend destinations 101–106
  collection by agents 74–77
  compute-related sources 47
  containers 50–51
  correlation 214, 216–220
  costs and benefits 31–34
  instrumentation 28–29
  Kubernetes 54
  microservices app 10
