```
Creating logs_promtail_1 ... done
Creating logs_grafana_1  ... done
Attaching to logs_loki_1, logs_grafana_1, logs_promtail_1
...
```

Now, you can head over to http://localhost:3000/ in your browser to log into Grafana. Use the following defaults (be sure to skip the password change request after you enter the credentials):

- Username: `admin`
- Password: `admin`

Next, configure the Loki data source as shown in figure 2.1 (note that the screenshot has been edited so that it focuses on the relevant parts; in reality, you would see many more options on this screen). The only config you need to set in this step is the data source URL, which is `http://loki:3100`, thanks to our Docker Compose setup.

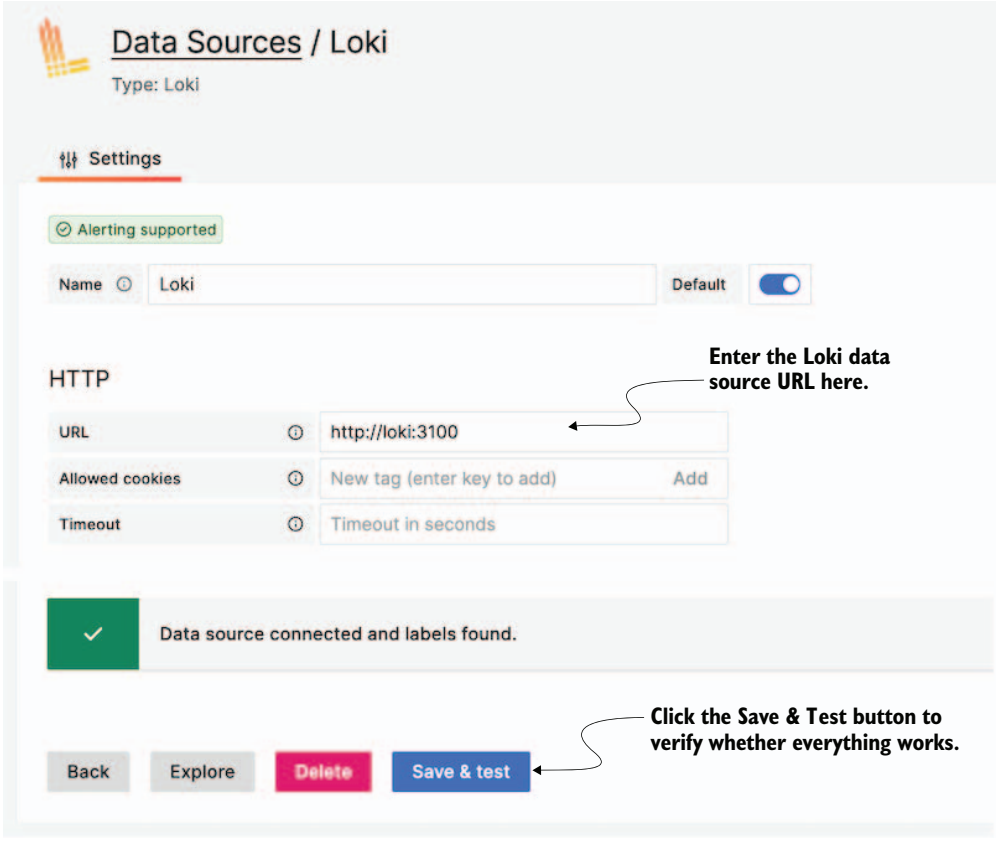

Figure 2.1 Adding and configuring the Loki data source in Grafana
