2.4 Metrics 26

Instrumentation 28 ▪ Telemetry 29 ▪ Costs and benefits 31 Observability with metrics 34

2.5 Traces 34

Instrumentation 36 ▪ Telemetry 37 ▪ Costs and benefits 39 Observability with traces 41

2.6 Selecting signals 42

3 *Sources 44*

3.1 Selecting sources 45

3.2 Compute-related sources 46

Basics 46 ▪ Containers 49 ▪ Kubernetes 51 ▪ Serverless compute 55

3.3 Storage-related sources 58

Relational databases and NoSQL data stores 58 ▪ File systems and object stores 60

3.4 Network-related sources 61

Network interfaces 61 ▪ Higher-level network sources 62

3.5 Your code 63

Instrumentation 64 ▪ Proxy sources 64

4 *Agents and instrumentation 66*

4.1 Log routers 67

Fluentd and Fluent Bit 68 ▪ Other log routers 73

4.2 Metrics collection 74

Prometheus 74 ▪ Other metrics agents 76

4.3 OpenTelemetry 77

Instrumentation 79 ▪ Collector 81

4.4 Other agents 90

4.5 Selecting an agent 91

Security for and of the agent 91 ▪ Agent performance and resource usage 92 ▪ Agent nonfunctional requirements 93

5 *Backend destinations 95*

5.1 Backend destination terminology 96

5.2 Backend destinations for logs 97

Cloud providers 97 ▪ Open source log backends 99 Commercial offerings for log backends 100
