index

A

accessor functions 130
adjacency matrix 179–182
animation 246–248
append() function 42, 59, 71
appendChild() function 101
arc() function 144
area() function 131, 135
array functions 33–34
attr() function 34, 59, 83
attributes 14
axes
  plotting data 110–112
  styling 112–117
axis() function 111, 116

B

bar charts 267
big data
  geodata
    creating random 306–309
    drawing with canvas 309–310
    mixed-mode rendering techniques 310–316
    overview 304–306
  network data 316–320
  optimization
    avoiding general opacity 326
    avoiding general selections 326
    generating random xy data 321
    precalculating positions 327–328
    quadtrees 320–321
    xy brushing 322–326
binding data
  append() function 59
  attr() function 59
  D3.js and 10–11
  data() function 58–59
  enter() function 59
  inline functions 59–61
  integrating scales 61–65
  selectall() function 58
  selections and 57–58
binning, defined 52
bl.ocks.org 317
<body> element 13
brushing
  brush events 281
  creating brush 274–277
  making brush user friendly 278–281
  redrawing components 281

C

canvas 21
  drawing geodata 309–310
  drawing on 237, 249–250
  overview 248–249
  toDataURL() function 250–252
cartograms 238–239
Cascading Style Sheets. *See* CSS
casting, defined 52
categorical data 51, 54
channels, defined 68
charge property 193
charge() function 186
chargeDistance() function 202
charts
  accessor functions 130
  axes
    plotting data 110–112
    styling 112–117
  complex graphical objects 117–124
  components 109
  function types and 108–109
  generators 109
  layouts 109–110
  line
    drawing from points 126–128
    drawing many with multiple generators 128
    interpolators 129
    overview 124–126
choropleth maps 215
circle packs 267–268
<circle> element 21–23
classed() function 29
cloneNode() function 101
cloud() function 171
clustering 193
color
  discrete 92
  mixing 90–92
  for numerical data 92–94
  using effectively 88–90
Comma-Separated Values. *See* CSV
