node-link diagrams 36
nodes() function 186
normalizing, defined 52
NVD3 301

O

objects 37–38
offset() function 160–161
on() function 41
optimization
  big data
    avoiding general opacity 326
    avoiding general selections 326
    generating random xy data 321
    precalculating positions 327–328
    quadtrees 320–321
    xy brushing 322–326
  force-directed layout 202
order() function 161
ordinal() function 54
orient() function 114
outerRadius() function 144

P

pack layouts 148–151
parse() function 50
<path> element 25–26
pie charts 6
  creating ring chart 145
  drawing pie layout 144–145
  overview 142
  transitioning 146–148
plugins, layout
  Sankey diagram 163–169
  word clouds 169
PNG (Portable Network Graphics) 79
<polygon> element 21–23
Polymaps 4
position property 245
PostGIS 207
pow() function 54
pregenerated content
  HTML fragments 95–97
  images 94–95
  SVG 98–103
project architecture
  data 78–79
  external libraries 80–82
  images 79
  resources 79
  style sheets 79–80
projection zoom 237
projection, map 209–210
projection() function 153
properties 14
property() function 34
Protovis 4

Q

QGIS 207
quadtrees 320–321
quantile() function 54
quantitative data 50–51
quartile() function 117

R

range() function 62
raster reprojection 238
raw data 37, 52
<rect> element 21–23
remove() function 72
reusable components 301
rgb() function 89
rotate() function 171

S

Sankey diagram 163–169
satellite projection 226–227
Scalable Vector Graphics. *See* SVG
scale, map 210–211, 295–298
scale() function 50, 53
scaling data 53–54
<script> element 13
select() function 26, 42
selectAll() function 10, 58
selecting elements 10
semantic zoom 219
silhouette keyword 160
size() function 186
"sketchy" style 9
spreadsheets
  animation 246–248
  data dashboard example 266–267
  using divs 245–246
  using table 243–244
stack layout 158–162
static diagrams
  adjacency matrix 179–182
  arc diagram 182–185
  network data 177–178
streamgraph 131, 158
style() function 34, 113
styles 14
sum() function 146
SVG (Scalable Vector Graphics)
  <circle> element 21–23
  force-directed layout markers 188–190
  <g> element 23–24
  <line> element 21–23
  overview 18–20
  <path> element 25–26
  <polygon> element 21–23
  pregenerated 98–103
  <rect> element 21–23
  <svg> element 20–21
  <text> element 23

T

tables, HTML 243–244
tabular data 34–35
tag clouds 169
temporal data 51–52
terrain maps 238
testing in console 18
text() function 48, 97
<text> element 23
tickSize() function 114
tickValues() function 123
tile mapping 233–235
TileMill 233
toDataURL() function 250–252
TopoJSON 37
  file format 227
  merging 229–231
  neighbors 232–233
  overview 227
  rendering 228
topological data 51
transform attribute 119
transform zoom 237
transforming data
  categorizing data 54
  changing datatypes 52–53
  nesting 55–56
  scaling 53–54
transition() function 43
transitions 84–86
trees 152–158
