To quickly analyze a business process, try to depict it using big blocks representing input, output, and actions leading to another. Next, try to add the data generated at each step. Finally, note the systems used to capture the data (figure 3.6).

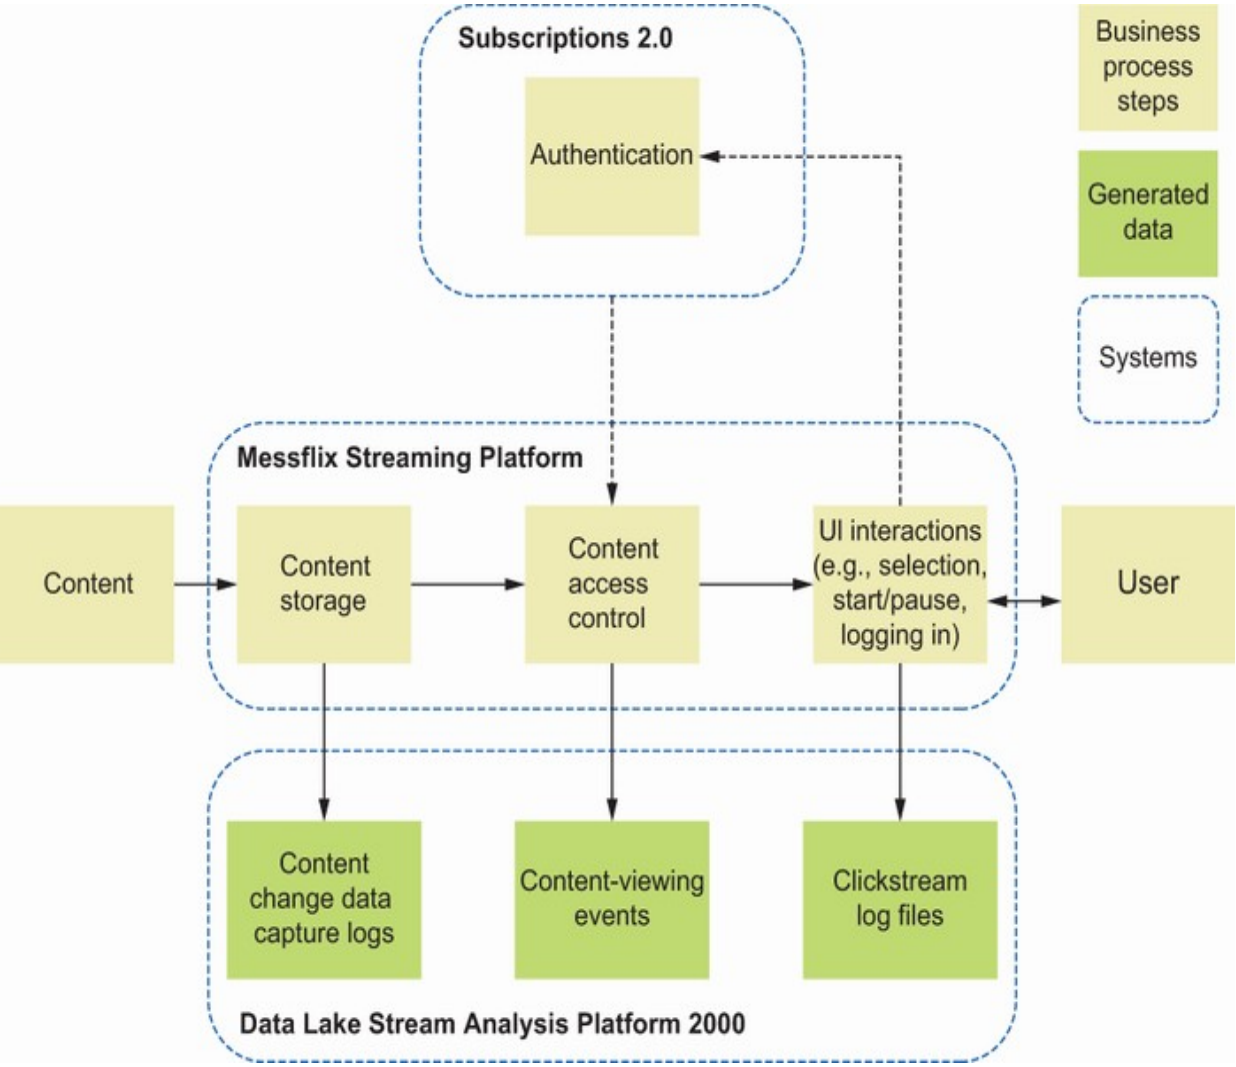

Figure 3.6 Quick process map developed for Messflix content distribution

The Messflix Streaming Platform data, even though it's generated in the context of the content distribution process, is transferred to Data Lake Stream Analysis Platform 2000, managed by the Data team, which claims it belongs to their analytical processes.
