```
        "name": "id",
        "uri": "https://ref.meshflix.com/person/93384349835",
        "titles": "Id",
        "datatype": "string"
      },
      {
        "name": "name",
        "uri": "https://ref.meshflix.com/person/93384349836",
        "titles": "Name",
        "datatype": "string"
      },
      {
        "name": "surname",
        "uri": "https://ref.meshflix.com/person/93384349837",
        "titles": "Surname",
        "datatype": "string"
      },
      {
        "name": "gender",
        "uri": "https://ref.meshflix.com/generic/123393ed34",
        "titles": "Gender",
        "datatype": "enum"
      }
    ]
}
}
```

As you can see, the data and metadata have their unique identifiers (principle 1):

- ID of the person instance in listing 5.4:

```
"personId": "0173d228-ed2e-11eb-9a03-0242ac130003"
```

- ID of the Persons data product in listing 5.5:
