technological challenges 27
data contracts in 157 – 161
data warehouses and data lakes inside 9
decision drivers behind architecture selection 31 – 39
business drivers 31 – 33
determining if data mesh is good fit 38 – 39
domain-data drivers 35 – 36
minor organizational drivers 36 – 38
organizational drivers 33 – 35
defined 6
domain ownership 122
federated computational governance 191
implementation effort 45 – 55
development cycle 45 – 49, 52 – 55
enabling team 49 – 51
MVP 83
overview 4 – 7
principles of 15 – 23
data as a product 18 – 20
domain-oriented decentralized data ownership and architecture 16 – 18
federated computational governance 20 – 22
self-serve data infrastructure as platform 22 – 23
reasons for using 7 – 11
self-serve data platforms 217, 246
sharing agreements in 157 – 161
snow-shoveling business use case 11 – 15, 24
socio-technical architecture 25 – 27
cognitive load 26 – 27
Conway's law 25
team topologies 26
solution architecture design 281
Data Mesh in Action 13, 48, 165
data model complexity 35
data pipelines 105
data policies
automating policy checks 190 – 191
creating 174 – 175
