domain data 35
domain dataset 102 – 103
domain governance 178
domain ownership 122
    capturing and analyzing domains 90 – 95
    domain-driven design 91 – 92
    inviting the right people 92 – 93
    workshop technique 93 – 95
    data use cases 109 – 114
    case description template 110 – 111
    choosing right team to own data 114
    model and bounded context 111 – 113
    setting up boundaries of use-case-driven data products 113 – 114
    design heuristics 114 – 118
    defined 115
    designing heuristics and possible boundaries 115 – 118
    using 115
    domain decomposition 95 – 108
    assigning responsibilities to data-product-owning team 104 – 106
    business capabilities, defined 97 – 100
    choosing right team to own data 106 – 108
    decomposing domains using business capability modeling 100 – 101
    domains, defined 97 – 100
    relationship of domains and business capabilities to data 101 – 104
    subdomains, defined 97 – 100
    mesh of interconnected data products 118 – 121
    data products forming a mesh 120 – 121
    Messflix data mesh 118 – 120
domain storytelling 93 – 95
Domain Storytelling (Hofer and Schwentner) 94
domain-data decision drivers 35 – 36
    data diversity 35
    data volume 36
domain-driven design (DDD) 38, 89, 91 – 92
Domain-Driven Design (Evans) 92
domain-oriented datasets
    adding business benefit 75 – 76
