identifying 73 – 76
domain-oriented decentralized data ownership and architecture 16 – 18

E

Efficient governance maturity tier 37
ELT (extract, load, transform) approach 39
employee requirements policy 175
enabling team 49 – 51
ensuring data governance 49
facilitating data product development 49
facilitating governance 51
facilitating platform development 50
encryption policy 175
enforcer pattern 270
enriching data 106
enterprise data warehouses 39 – 40
ETL (extract, transform, load) approach 39
Evans, Eric 91
event storming 93
Execute Postproduction 100
Execute Production 100
external architecture view 140 – 144
data product ports 142
database-like storage 142
files 142
REST API 142 – 143
streams 143
visualizations 143 – 144

F

facilitation 201 – 202
FAIR (findable, accessible, interoperable, reusable) 152
fast-moving consumer goods (FMCG) example 32 – 33
federated computational governance 20 – 191, 193
benefits of data governance 167 – 169
business value perspective 167 – 168
data control perspective 168 – 169
data usability perspective 168
