analyzing 255
capturing architectural drivers of data-product design 253
future architecture design 259 – 279
design session 260
exposing data for stream processing and batch processing 275 – 279
data lake and data products 279
event stream as data product port 277 – 279
file-based data product 260 – 265
from monolith and microservice to data product 266 – 275
Cast data product 268
Scripts data product 272 – 275
turning database inside out 268 – 272

G

GCP (Google Cloud Platform) 223 – 230
architecture summary 229 – 230
identifying components of data product 225 – 226
identifying components of platform 225
relation to data mesh ideas 228 – 229
self-serve data platform architecture 223
variations 227 – 228
workflows 227
gender enum 155
gender property 155
Glue 230
Glue Data Catalog 230
Google Cloud log router and sink 228
GraphQL 143
