MVP (minimal viable infrastructure as platform) 56 – 83
developing minimal data products 72 – 80
choosing data product owners 76 – 77
developing simplest tools to expose data 79 – 80
identifying domain-oriented datasets 73 – 76
minimum viable data product description 77 – 79
environment selection sheet 283
implementation team 63 – 69
cooperation model 66
data governance team 66 – 69
development teams 63 – 64
self-serve data platform 193 – 200
platform definition 195 – 197
platform thinking 197 – 200
setting up minimal platform 80 – 83
ensuring platform security 82 – 83
ensuring platform-forced governability 81 – 82
setting up MVP governance 69 – 72
defining data governance policies 71 – 72
defining data mesh value statements 70 – 71
federating data governance 72
stakeholder analysis 60 – 63
system landscape diagrams 58 – 60

N

Neward, Ted 257
nodes 5, 133
Non-Invasive Data Governance (Seiner) 70, 173
nonfunctional requirements 253

O

OKRs (objectives and key results) 31, 52, 171
open source 259, 262
operational metadata 147
operational metrics 147
organizational decision drivers 33 – 35
data maturity 33
minor organizational decision drivers 36 – 38
