Preface xiii

Part 1: Overview of the Databricks Unified Data Intelligence Platform

1

Getting Started and Lakehouse Concepts 3

Components of the Data Intelligence Platform 3
Advantages of the Databricks Platform 4
Open source features 5
Databricks AutoML 7
Reusability and reproducibility 7
Open file formats give you flexibility 7
Applying our learning 10
Technical requirements 10
Getting to know your data 11
Project: Streaming Transactions 11
Project: Favorita Sales Forecasting 13
Project: Multilabel Image Classification 14
Project: Retrieval Augmented Generation Chatbot 15
Summary 16
Questions 16
Answers 16
Further reading 17

2

Designing Databricks: Day One 19

Planning your platform 19
Defining a workspace 21
Selecting the metastore 21
Defining where the data lives, and cloud object storage 23
Discussing source control 24
Discussing data preparation 25
Planning to create features 27
Modeling in Databricks 28
