4. Now, we're going to write a function called `CLASSIFY_EMOTION`. We're using the AI Function `AI_QUERY` again, but this function will use a new prompt asking the model to classify a given sentence as one of six emotions.

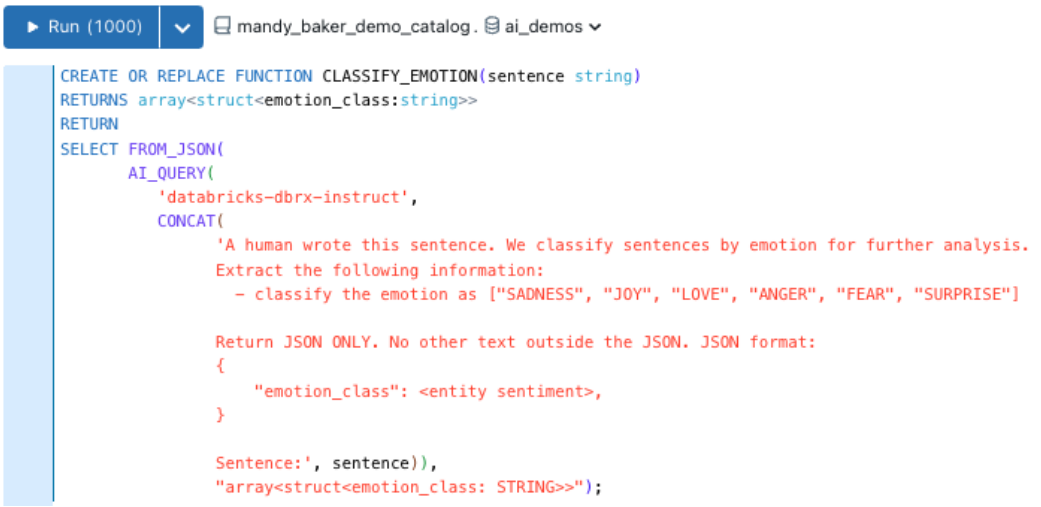

Figure 8.19 – Creating a function to classify sentences by emotion

5. Let's call our function to evaluate an example sentence and take a look at the results.

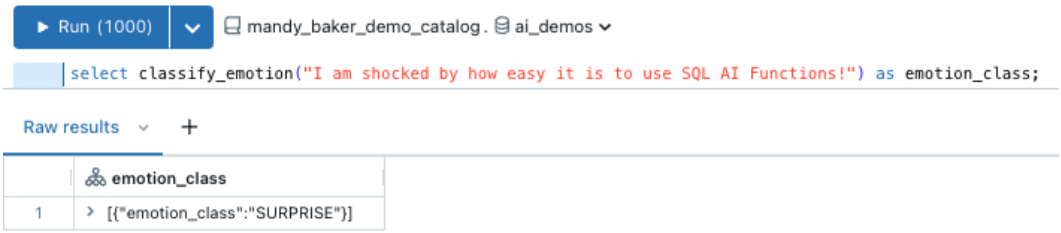

Figure 8.20 – Calling the CLASSIFY_EMOTION function
