Databricks
data and models, monitoring 30
modeling 28, 29
Databricks Asset Bundles (DABs) 179
Databricks Assistant 84
used, for exploring data 84-87
Databricks' Auto Loader
using, benefits 50
Databricks AutoML 7
Databricks Feature Engineering (DFE) 111, 142
batch feature 112
in Unity Catalog 112, 113
on-demand feature 112
on streaming data 114, 115
on streaming pipelines 114, 115
streaming feature 112
Databricks File System (DBFS) 24
Databricks Lakehouse Monitoring
alerting 82
mechanics 82
monitor, creating 83, 84
used, for data monitoring 82
visualization 82
Databricks LLM Playground 148-150
Databricks Machine Learning Runtimes 164
Databricks Marketplace
data, integrating via 147
Databricks Model Serving 15
Databricks SQL dashboards
big data, visualizing with 221-224
Databricks SQL (DBSQL) 4, 221
Databricks Vector Search (VS) 79
benefits 92
data retrieval, enhancing with 92, 93
embedding model support 93
setting up 93
Databricks Workflows 178, 179
Databricks workspace
Kaggle setup 32
projects, starting 40
requisites 31
setting up 32
data integrity
improving, with DLT 80, 81
Data Intelligence (DI) 175
Data Intelligence Engine 3
Data Intelligence Platform, advantages
advantages 4, 5
Databricks AutoML 7
open file formats 7
open source features 5, 6
reusability and reproducibility 7
Data Intelligence Platform (DI)
components 3, 4
data loaders 72, 73
Data Manipulation Language (DML) 54
data preparation 25, 26
Bronze layer 25
features, creating 27
Gold layer 25
Silver layer 25
data profiles
generating, with AutoML 88-90
data retrieval
enhancing, with Databricks VS 92, 93
data science projects
learning 117
streaming transactions 117-119
technical requirements 117
time series forecasting 132-137
data science projects, streaming transactions
on-demand feature, building with Python UDF 130, 131, 132
streaming feature, building with Spark Structured Streaming 119-129
