3.4. Higher-order functions

3.4.1. Invoking other functions

3.4.2. Example: Counting words in a file

3.4.3. Functions as arguments

3.4.4. Exercises

3.5. Scope

3.5.1. Lexical function scope

3.5.2. No block scope

3.5.3. Implicit variable declarations

3.5.4. Nesting

3.6. Closures

3.6.1. Global state problems

3.6.2. Functions as return values

3.6.3. Extended example: using closure

3.7. Putting it together

3.8. Summary

Chapter 4. Dynamic objects

4.1. Syntax

4.1.1. Literals

4.1.2. Properties

4.1.3. YAML-style syntax

4.2. Key-value stores

4.2.1. Data

4.2.2. Key-values for named arguments
