2. Composition

Chapter 5. Composing objects

5.1. Being classical

5.1.1. Raw data

5.1.2. Class abstractions

5.2. Class inheritance

5.2.1. extends

5.2.2. How does it work?

5.3. Class variables and properties

5.3.1. Usage

5.3.2. Declaring (to keep things together)

5.3.3. Exercise

5.4. Overriding and super

5.4.1. Overriding

5.4.2. super

5.5. Modifying prototypes

5.5.1. How class declarations work

5.5.2. How methods work

5.5.3. Dynamic classes

5.6. Extending built-ins

5.6.1. Built-in constructor prototypes

5.6.2. Extending date

5.6.3. Don’t modify objects you don’t own

5.7. Mixins
