11.6.1. Abstraction and APIs
11.6.2. Dealing with time
11.7. Summary
Chapter 12. Modules and builds
12.1. Server-side modules (on Node.js)
12.1.1. Creating and requiring
12.1.2. Exporting
12.1.3. No file extensions
12.1.4. The module cache
12.1.5. Putting it together
12.1.6. Indexes
12.2. Build automation with Cake
12.2.1. Cake and build tasks
12.2.2. Test tasks
12.2.3. Task dependencies
12.3. Client-side modules (in a web browser)
12.3.1. Making modules work in a browser
12.3.2. How to write a module system
12.3.3. Tests
12.4. Application deployment
12.4.1. Creating an artifact (something that's easy to deploy)
12.4.2. Creating a manifest (something that tells your artifact where it is)
12.5. The final Cakefile
