`DuckRace` class will show how it should be used and demonstrate that it works correctly when used as intended. There's more about testing in chapter 10.

Postel's law

Be conservative in what you do; be liberal in what you accept from others.

Duck typing means you're liberal in what you accept. What you accept only has to adhere to an interface.

In listing 7.4 you see a new version of the competition program. This time teams can be added dynamically. The competition organizes a tournament between teams where the winner of each game is determined randomly. Without relying on a type system, any object that can't act like a team for the purposes of the competition is excluded. This listing is intended to run in a web browser; you can use the server from listing 7.5 to achieve that.

Listing 7.4. Competition
