```
Log 'Hello world!' to the console

    console.log 'Hello World!'
```

As a further example, consider a literate CoffeeScript program using an excerpt from W. B. Yeats's poem "The Wild Swans at Coole":

```
W B Yeats
The Wild Swans at Coole

The trees are in their autumn beauty,

    trees = [{}, {}]
    for tree in trees
      tree.inAutumnBeauty = yes

The woodland paths are dry,

    paths = [{}, {}, {}]
    for path in paths
      path.dry = yes

Under the October twilight the water
Mirrors a still sky;

    octoberTwilight = {}
    stillSky = {}
    water =
      placeUnder: ->

    water.placeUnder octoberTwilight
    water.mirrors = stillSky

Upon the brimming water among the stones
Are nine-and-fifty swans.

    water.brimming = true
    water.stones = [{}, {}, {}, {}]

    class Swan
      x: 3
```
