```
        },
        "properties": []
      },
      "value": {
        "params": [
          {
            "name": {
              "value": "x"
            }
          }
        ],
        "body": {
          "expressions": [
            {
              "base": {
                "value": "x"
              },
              "properties": []
            }
          ]
        },
        "bound": false
      }
    }
  ]
}
```

Figure 8.3 contains a graphical representation of this AST. It demonstrates a remarkable uniformity and can give new insight into the nature of some expressions. For example, a function is a value with params and a body.

Figure 8.3. An example abstract syntax tree
