Figure 5.5. Agtron’s shop with news announcements

Chapter 6. Composing functions

Figure 6.1. How not to write programs

Figure 6.2. Visualizing compose, before, after, and around

Chapter 7. Style and semantics

Figure 7.1. Table of teams ranked by points

Figure 7.2. Stick to common language patterns, but be careful of ambiguity.

Chapter 8. Metaprogramming

Figure 8.1. The CoffeeScript compiler is written in CoffeeScript.

Figure 8.2. The internal CoffeeScript compilation process

Figure 8.3. An example abstract syntax tree

Chapter 9. Composing the asynchronous

Figure 9.1. Asynchronous I/O doesn’t block the event loop.

Figure 9.2. Blocking the event loop stops the world.

Figure 9.3. Don’t block the event loop—unless you like to wait.

Figure 9.4. In your version of Pong, the user controls the paddle with the keyboard.

Figure 9.5. Don’t wait forever. Treat input as a series of events and process it as it arrives.
