

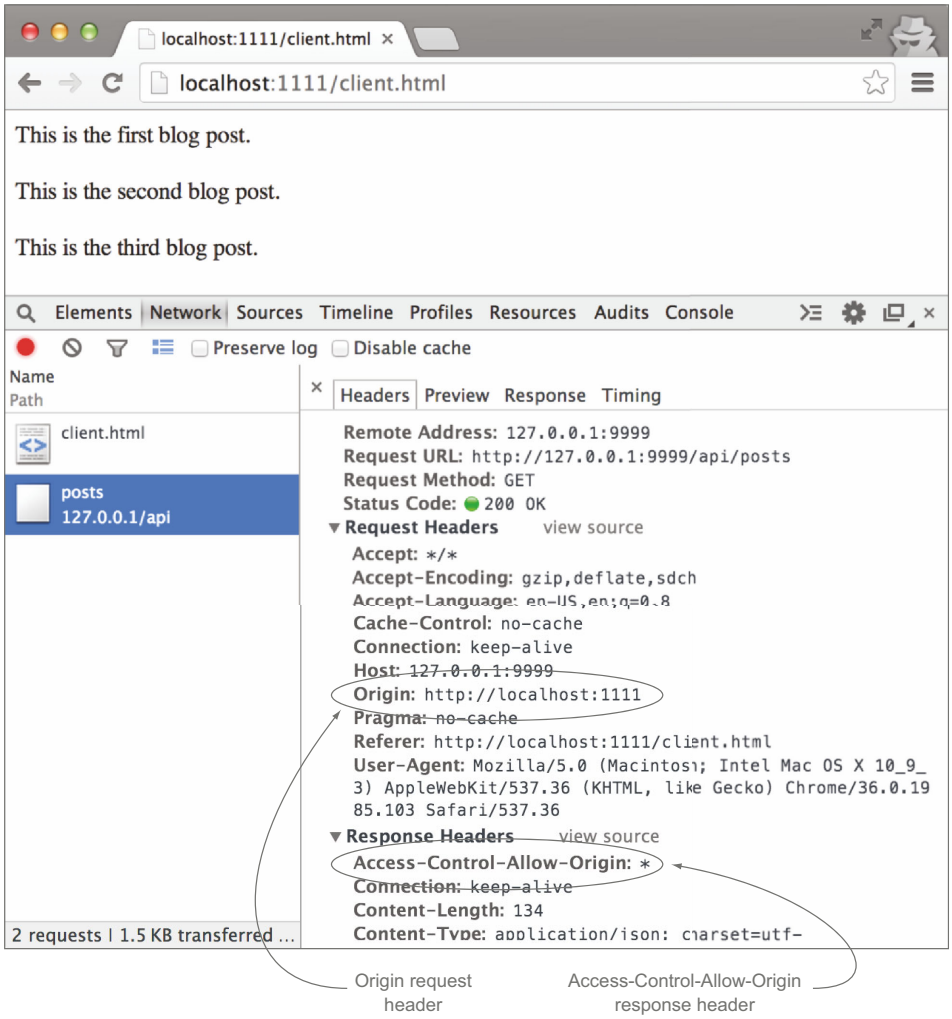

Figure 3.19 Adding wildcard CORS support to the server

Listing 3.4 Adding wildcard CORS support to the server

```
var handleCors = function(req, res, next) {
  res.set('Access-Control-Allow-Origin', '*');
  next();
};

var SERVER_PORT = 9999;
var serverapp = express();
serverapp.use(express.static(__dirname));
serverapp.use(handleCors);
serverapp.get('/api/posts', function(req, res) {
  res.json(POSTS);
});
```

Introduces new handleCors middleware

Adds Access-Control-Allow-Origin response header

Adds handleCors middleware to server
